Scrimba

- "The Frontend Developer Career Path"

freeCodeCamp

- JavaScript Algorithms and Data Structures

epam

- IT Marathon

As a Frontend Developer, I possess the technical skills and expertise to create engaging and user-friendly websites and applications. I have experience with web development languages such as HTML, CSS, and JavaScript, as well as with popular frontend framework - React. I am able to design and implement responsive layouts, integrate APIs and maintain existing projects. My attention to detail and passion for clean, maintainable code make me a valuable asset to any team.
